SUMMARY

Technical Lead and full-stack real-time 3D engineer with experience building interactive 3D visualization tools, content-authoring workflows, cross-platform applications, and backend systems.

EXPERIENCE

Acidental Inc. - Technical Lead

January 2024 - Present

- Led technical planning for a small development team, including architecture decisions, implementation strategy, testing standards, and release readiness.
- Full-stack developer for a cross-platform education platform that leverages web and mobile apps.
- Built interactive 3D teaching and assessment workflows, including model lecturing tools, class management, customizable assignments, and student performance review.
- Implemented CI/CD, Unity build automation, editor tools, and asset/data workflows for repeatable production releases.

PROJECTS

Stripped - Technical Lead

www.PlayStripped.com

- Developed core gameplay systems, UI, scenario logic, real-time networking, and asset delivery for a browser-playable Unity game.
- Implemented backend systems for creating, managing, and delivering custom game content.
